PROFESSIONAL SUMMARY

B.Tech (CSE – Data Science), Graduating 2026, with hands-on experience in Python, SQL, Machine Learning, Data Analytics, and Business Intelligence. Delivered end-to-end solutions — including a full-stack Random Forest classifier (85.6% accuracy) deployed via FastAPI on Render, and a PostgreSQL + Power BI analytics dashboard modeling 100K+ e-commerce orders. Gained industry exposure through a Data Science internship working with real client datasets.

TECHNICAL SKILLS

Programming: Python, SQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

Data Analysis: EDA, Data Cleaning, Feature Engineering, Segmentation, Correlation Analysis, Statistical Analysis

Machine Learning: Classification, Model Evaluation & Comparison, Hyperparameter Tuning (RandomizedSearchCV), Scikit-Learn Pipelines, Class Imbalance Handling

Deployment & APIs: FastAPI, REST APIs, Pydantic, CORS, Render

Databases & BI: PostgreSQL, Power BI, DAX, DirectQuery, MS Excel

Visualization: Matplotlib, Seaborn

Tools: Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, VS Code

PROJECTS

Room Type Predictor — NYC Airbnb ([link](#))

Jun – Jul 2026

Tech Stack: Python, Scikit-Learn, FastAPI, Pandas, JavaScript, Render

- Built an end-to-end ML pipeline classifying 48,895 NYC Airbnb listings into 3 room types, engineering a ColumnTransformer preprocessing pipeline (StandardScaler + OneHotEncoder) across 8 numerical and 2 high-cardinality categorical features.
- Benchmarked 4 classifiers (Logistic Regression, Decision Tree, Random Forest, Gradient Boosting); tuned Random Forest via RandomizedSearchCV achieved 85.6% test accuracy and 0.742 macro F1-score, handling class imbalance with balanced class weighting.
- Deployed a production REST API with FastAPI and Pydantic-validated schemas, serving real-time predictions with class probabilities to a custom JavaScript frontend.
- Shipped the full-stack application live on Render as independently deployed frontend and backend services with CORS-enabled cross-origin communication.

Olist E-Commerce BI Dashboard ([link](#))

Jul – Aug 2026

Tech Stack: PostgreSQL, SQL, Power BI, DAX, DirectQuery

- Designed a PostgreSQL relational schema across 9 tables (~100K orders) with foreign keys and indexes, then built a 5-view SQL semantic layer using a fact/dimension pattern for BI consumption.
- Engineered 26 DAX measures — including YoY growth, rolling 30-day revenue, and on-time delivery rate — on a DirectQuery connection from Power BI to PostgreSQL.
- Delivered a 9-page interactive dashboard (sales, customer geography, logistics, reviews, payments, sellers) with category-level drillthrough, surfacing \$14.2M revenue across 98.7K orders at a 93.23% on-time delivery rate and 4.03 avg rating.

EXPERIENCE

Solitaire Infosys Pvt. Ltd. — Data Science Trainee

Jan 2026 – Jul 2026 | Mohali, Punjab

- Cleaned and preprocessed portions of a telecom client's dataset as part of a collaborative team effort.
- Assisted in identifying key columns relevant for churn analysis on the processed data.
- Gained hands-on exposure to real client data handling in a professional setting.

CERTIFICATIONS

Data Analysis with Python — [FreeCodeCamp](#) | Jul 2025

Machine Learning with Python — [FreeCodeCamp](#) | Jul 2025

ACHIEVEMENTS

- 1st Place in Project Display Competition among 1,000+ participants — Gulzar Group of Institutes.
- International remote experience as AI Trainer & Prompt Engineer at Outlier (USA) for 6 months.
- Built and deployed a full-stack ML application (FastAPI + Random Forest) with real-time inference, live in production on Render.
- Grew a 500+ member professional community on LinkedIn.

EDUCATION

B.Tech — Computer Science & Engineering (Data Science)

2022 – 2026

Gulzar Group of Institutes, PTU | Ludhiana, Punjab

Relevant Coursework: Data Science, Statistics, DBMS, Machine Learning, Python Programming
